

# SQL TESTS

COMMON *THEORY* QUESTIONS  
+ ANSWERS

# QUESTION 01

Q) WHAT IS A **RELATIONAL**  
DATABASE?

A relational database (based on the mathematical theory of relations) is a collection of tabular datasets (columns & rows) that relate to each other through shared columns

## QUESTION 02

Q) EXPLAIN WHAT A **RELATIONAL DATABASE MANAGEMENT SYSTEM** (RDBMS) IS

A Relational Database Management System (RDBMS) is software that allows you to create and access a relational database, and execute commands & queries on the data within it

## QUESTION 03

Q) EXPLAIN THE DIFFERENCE  
BETWEEN AN **INNER** JOIN & A **LEFT**  
JOIN

An inner join returns rows where there is a match (on the join condition) in BOTH tables

A left join returns all rows from the left table, even if there are no matches in the right table. Where no match is found, we are returned null values

## QUESTION 04

Q) EXPLAIN THE DIFFERENCE BETWEEN THE **WHERE** CLAUSE AND THE **HAVING** CLAUSE

The **WHERE** clause is used to apply conditions/filters **BEFORE** any aggregation takes place (or where no aggregation takes place)

The **HAVING** clause is used to apply conditions/filters **AFTER** aggregation takes place

## QUESTION 05

Q) EXPLAIN THE DIFFERENCE BETWEEN **UNION** & **UNION ALL**

Both are used to stack multiple datasets together (provided the datasets have matching columns)

UNION removes duplicate records from the resulting dataset...UNION ALL does not

>> UNION is often slower than UNION ALL due to the extra resource required to remove duplicates

## QUESTION 06

Q) EXPLAIN THE DIFFERENCE BETWEEN **RANK** & **DENSE RANK**

RANK will give tied values the same ranking. Following the tie it will assign the next ranking based on the number of rows (essentially skipping rankings)

DENSE RANK also gives tied values the same ranking but following the tie will go to the next number sequentially

>> Example

For the values [ 10, 10, 10, 11, 12 ]

RANK gives [ 1, 1, 1, 4, 5 ]

DENSE RANK gives [ 1, 1, 1, 2, 3 ]

## QUESTION 07

Q) EXPLAIN WHAT AN AGGREGATION FUNCTION DOES (AND LIST 3)

An Aggregation Function performs calculations on set of values, and returns a single value. (When aggregating value by group(s), we also use the GROUP BY statement)

Common ones are...

[ COUNT, SUM, AVG, MAX, MIN ]

## QUESTION 08

Q) EXPLAIN WHAT A WINDOW FUNCTION DOES (AND LIST 3)

Window functions look at values from a set of rows (the window) and based on this, return a value for each row

Any of...

[ RANK, DENSE RANK, ROW NUMBER, NTILE, LAG, LEAD, FIRST VALUE, LAST VALUE ]

## QUESTION 09

Q) EXPLAIN THE DIFFERENCE BETWEEN A **FULL OUTER JOIN** & A **CROSS JOIN**

A **CROSS JOIN** returns all possible combinations of rows in both tables (also - there is no ON condition)

A **FULL OUTER JOIN** returns all possible rows from each table. Where a match is found (based on the join condition) we are returned the values from the other table, otherwise we are returned null values.

>> A **FULL OUTER JOIN** is essentially like executing both a left join and right join at the same time

## QUESTION 10

Q) WHAT IS MEANT BY THE "ORDER OF EXECUTION" IN SQL

The "order of execution" is the order in which clauses within a query are evaluated by the system

The order is...

- FROM
- JOIN + ON
- WHERE
- GROUP BY
- HAVING
- SELECT (& Window Functions)
- ORDER BY
- LIMIT

Knowing this can be useful when looking to optimise queries

Want to land an incredible  
role in the exciting, future-  
proof, and lucrative field of  
**Data Science?**

# LEARN THE RIGHT SKILLS

A curriculum based on  
input from **hundreds** of  
leaders, hiring managers,  
and recruiters

# BUILD YOUR PORTFOLIO

Create your professionally  
made portfolio site that  
includes **10 pre-built**  
projects

# EARN THE CERTIFICATION

Prove your skills with the  
**DSI Data Science  
Professional Certification**

# LAND AN AMAZING ROLE

Get guidance & support  
based upon **hundreds of**  
**interviews** at top tech  
companies

Taught by former Amazon  
& Sony PlayStation Data  
Scientist **Andrew Jones**

What do **DSI**  
students say?

"I had over 40 interviews without an offer. After **DSI** I quickly got **7 offers** including one at **KPMG** and my amazing new role at **Deloitte!**"

- Ritesh

"The **best program** I've been a part of, hands down"

- Christian

"DSI is **incredible** - everything is taught in such a clear and simple way, even the more complex concepts!"

- Arianna

"**I got it!** Thank you so much for all your advice & help with preparation - it truly gave me the **confidence to go in and land the job!**"

- Marta

"I've taken a number of Data Science courses, and without doubt, DSI is the best"

- William

"One of the best purchases towards learning I have ever made"

- Scott

"I learned more than on any other course, or reading entire books!"

- Erick

"I started a bootcamp last summer through a well respected University, but I didn't learn half as much from them!"

- GA

"100% worth it, it is amazing. I have never seen such a good course and I have done plenty of them!"

- Khatuna

"This is a world-class Data Science experience. I would recommend this course to every aspiring or professional Data Scientist"

- David

"Andrew's guidance with my Resume & throughout the interview process helped me land my amazing new role (and at a much higher salary than I expected!)"

- Barun

"DSI is a fantastic community & Andrew is one of the best instructors!"

- Keith

"I'm now at University, and my Data Science related subjects are a **piece of cake** after completing this course!

I'm so glad I enrolled!"

- Jose

"In addition to the great content, Andrew's dedication to the growing DSI community is **amazing**"

- Sophie

"The course has such high quality content - you get your ROI even from the first module"

- Donabel

"The Statistics 101 section was awesome! I have now started to get confidence in Statistics!"

- Shrikant

"I can't emphasise how good this programme is...well worth the investment!"

- Dejan

Come and join the  
hundreds & hundreds of  
other students getting the  
**results** they want!
